About This Game

The story follows Iris, a girl who learns that her younger sister is transferring to her school, and will be living with her for the rest of the semester. Even though she has never met her sister before, Iris is determined to make up for lost time by becoming friends, and more importantly, to show off her dependable nature as the older sister of the household.

Unfortunately for Iris, however, things don't go as planned.

Zoey, Iris's younger sister, is a tall young woman who isn't afraid to ditch class and badmouth others. Zoey shows little respect for authority, especially when it comes to her "older sister's" attempts to play nice. And if things couldn't get any worse, a confusing sexual tension blooms between them...

-
- Animated CGs! Special scenes have animated intros
 - Yuri visual novel about an attraction between two sisters
 - In-game choices change the ending
 - 1080p window & full screen options.

Title: Love Ribbon
Genre: Casual, Indie
Developer:
Razzart Visual
Publisher:
Razzart Visual
Release Date: 27 Jan, 2017

a09c17d780

English,Simplified Chinese

if you like yuri and you like vn and a kinda deep story and you have an open mind... this is your game
8V10. I learned to be suspicious whenever a game's reviews are "Overwhelmingly Positive". This basically just means that only hardcore fans of the genre are buying and reviewing.

This is a fine example of how most visual novels are created with the least possible effort:

Using the same boring background images again and again, no voice acting. If you are showing a park or class room, why not include some persons\students?

I believe there will be more interesting stuff further into the game, but I am not risking to be bored to dead on the way there....
While the story did make me a little uncomfortable a number of times, the story was still cute and touching.. why did i waste my money on this
